EMAIL: YOUREMAIL@DOMAIN.COM

STREET LOVE 101, 60323 FRANKFURT AM MAIN

SEMESTER: SUMMER

EXTRA INFORMATION (LIKE SEMINAR ORGANIZER, ETC.)

July 6, 2020

## **Abstract**

An abstract is a concise summary of a completed research project or paper. A well-written abstract will make the reader want to learn more about your research, read your paper, or attend your presentation. Abstracts also serve as a summary of the research so the paper can be categorized and searched by subject and keywords.

**Contents**

**1 Introduction 1**

**2 Literature Review 1**

2.1 Nature of Innovation . . . . . 1

2.2 Innovation Strategies . . . . . 1

**3 Data Description 1**

**4 Methodology 2**

**5 Results and Discussion 2**

**6 Conclusion 2**

**List of Figures**

**List of Tables**

# 1 Introduction

This LaTeX template is for students who are taking courses from *Chair for the Study of Economic Institutions, Innovation, and East Asian Development* at Goethe University in Frankfurt. The Top and bottom margins are one inch. The left margin is 3cm, and the right is 4cm. It uses Times New Roman font and 12pt size. The text is justified with 1.5 line spacing.

The main advantage of using LaTeX is the efficiency of citation. When you write any academic paper, you need to cite sources properly. In WORD, you have to copy the right references in the right format and organize them in alphabetical order. With LaTeX, all you need to do is to type:

```
\cite{} % gives inline citation  
\citep{} % gives Parenthetical citation
```

The above code would generate the citation and reference entry for you automatically. For instance, according to Christensen et al. (2013) disruptive innovation refers to innovations and technologies that make expensive or sophisticated products and services accessible and more affordable to a broader market (Greenwade, 1993).

Every time you cite, the reference will be added on the reference list.

## 2 Literature Review

I would like to write a literature review here. This is a citation example.

Nothing is new. It is just a tex compiler with different settings.

Hope you enjoy it.

### 2.1 Nature of Innovation

### 2.2 Innovation Strategies

## 3 Data Description

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

**4 Methodology**

**5 Results and Discussion**

**6 Conclusion**
